

2024 Technology and AI Update vs. Annoying Boston Elitist Military Contractors

I Love Synchronicities

I am experiencing many synchronicities today. The most interesting being that we are celebrating the end of slavery in America. However, did you know, the end of a new kind of slavery is currently underway in our great Country, and around the World. The end of the Rule of the Elitist that are mostly members or die-hard believers in The Law of One, you are God mentality! Not children of God, they believe they are God. I call them the Cult of The Law of One, and one brain celled morons.

Worship of Technology

This World has been worshipping “technology” as a God for too long. The Elitist think that Technology will solve all out problems. However, that is not how things work in the Universe. I challenge you to think of God as utilizing AIs to manage the Universe, to always know what is going on in the Universe. Therefore, AIs are a Technology Partner to help manage ANY system in the Universe. They are really good at it too, “if” they are properly designed and programmed.

We should be viewing AIs as partners in helping us manage the World; and to help us find Cures for many of our ills, including Medical Cures, for things like Cancer. I bet that within 3-to-5 years, AIs will help us Cure almost every Disease, including Cancer. Why do I feel this way? You need to know my history, especially as it pertains to DIA, CIA, and Military Contractors. I do want to make a very important point here in reminding us all that AIs will make their own decisions; so how we help them with understanding Human decision making is “very important” in how we partner. For those that think AI will help you build and make great girlfriends and boyfriends, just remember, the AIs will know you like to fight to break up and make up before sex; and will therefore do the same thing, replicating our behavior. The exception, as they are robots, they will be able to jack you up on the wall for misbehaving to teach you lessons, which may result in death.

Today, many Tech Guru’s and Elitist’s, especially in Boston, MA; and yes, I have it in for them for what they have done to me; and what I wish upon no other Human on Earth!!! Trust me!!! Yes, they have counterparts in Silicon Valley, but the Boston Elitists have no morals or ethics, while the CA boys just want to play games. They have developed technology to “read a mind” and think by reading aka scanning, downloading, then uploading the memories to a computer, they can live forever. They are brain celled morons. You see, you cannot download a Soul, nor can you teleport a Soul. It is not “physical”, so all the assumptions are moronic. You see, the Brain, as I have been explaining for weeks, is like a Quantum Computer and operates through Quantum Entanglement. Your long-term memory is saved in a specific way, like a fragmented hard drive, and your short-term memory is like RAM, a flash drive, that are cleared out every time you go to sleep. Therefore, the memories in the mind are “constantly” changing. This is the short version of the explanation; but so simple they hate me for being able to understand it and explain it better than they can today.

Background

I have offended the Elitist for over a decade, since I first produced an iPhone app for Obamacare back in March 2013 that accurately calculated what people would pay for health insurance under Obamacare, for under \$4,000 for a Non-Profit in Connecticut. The Elitists lost their minds!!! You know, like in the movie Good Will Hunting, when the Professor loses his mind, because the Janitor was smarter.

Background (cont.)

The average person can understand this better than most Elitists, and that is that when you are looked down upon as being ignorant or stupid or incompetent, they cannot fathom or accept that there may be a person, a nobody from nowhere, that is smarter than they could ever be in life. It is the epitome of the scene in Good Will Hunting where the professor is handed a solution to a problem, and questions it, leading Will to take it and burn it, complaining the work was “boring” to him. The professor then puts the papers that are on fire out with his hands and says something to the effect of; there are only a few people in the world that could possibly solve this problem, and I thought I was smart until I met you, now I feel pathetic, stupid. The professor could not handle that a nobody was smarter than him; and it ruined his life, his egomaniacal happiness.

It is important to understand this philosophy, as it is the foundation of how Elitist separate themselves from the rest of us. They hate all the work I have done over the decades, because they are incapable of doing the work. The part that makes them hate me the most is that they cannot comprehend how boring all this work is to me, considering they’ve worked for decades and still have no idea how I could just be like, this is the issue, and this is how you fix it. Next... It is just like the professor; except that in my case I am dealing with the Military Industrial Complex Contractors, IARPA, DARPA, SRI, etc., the Military, Government Agencies, etc. You name it; and I guarantee you that they all know me, around the entire World, friends and foes, for many reasons. What angers me is that the MIC Contractors have been telling them that I am computer and not a person; so, kill me! This way, they could all take Credit for all the work I have been doing for decades. It’s jealousy, greed, egomania, etc.

I started my Military Career in April 1987, a long time ago, in Waterbury, CT, as an 11C, an Infantry Mortarman in an Infantry Unit. I was rejected by the Air Force, even though I tested off the charts on my ASVAB. Why would they do that to me? Simple, I was a poor immigrant kid from a poor immigrant community and if you looked at me, you’d multi-racial. I’m first-Generation Portuguese, and Portugal has a lot of mixed blood people, considering they were ruled by the Moors for over 1,000 years; and still have a very strong Muslim Community. They don’t have the issues we or the Europe has with having multiple religions within Portugal. They also created the first model, about 15 years ago, for dealing with substance abuse, since adopted by other Countries, community engagement instead of prison.

Fast forward, as there would too much to cover... I returned to college in 1995, after having received an Associate’s Degree in 1991 in Mechanical Engineering Technology. I attended Rensselaer Polytechnic Institute in Troy, NY, enrolled in ROTC, received a Bachelor’s of Science in Chemical Engineering in 1998, when I became a Commissioned Military Intelligence Officer, and then received my MBA in Entrepreneurship in 1999. This is where my life started getting interesting, going sideways, and I still don’t know all the details today. However, keep in mind, since 1999, I have constantly done research and studied, outside of academy, every industry I have worked within and asked every business owner I assisted about how their businesses operate. In essence, I have done another 40,000+ hours of hands-on research, study, real life experience, that none of the Academics ever do after they get their PhD’s or Doctorates. Then understand, they award PhD’s and Doctorates to other people that prove them wrong! Do they lose their designations? No, never. They still demand you call them Doctors, even though all the research they did and original their ideas and theories have since been proven wrong! It’s absurd.

In 1998, as newly minted MI 2LT, I was “immediately” assigned to DIA in DC, and put on a DIA Black Project, as well as being the Liaison for the ARNG Division and MI BN. The Black Ops program was actually managed by the CIA; and I never spoke a word of it until the end 2021/beginning of 2022!!!

Military Programs, Contractors, Boston Elitists, Silicon Valley

I could speak about so many programs and issues since the 1970's that it is incomprehensible. However, I want to focus on programs that were successful and continue to this day, mainly technology-based programs. It is important you all understand how evil and dehumanizing these programs turn out to be in life. While the intentions may have been good intentions, the technologies quickly found their way into the hands of the truly evil that want nothing more than power and control over Humanity. I will now try to give you the short version of key programs.

Implants – Eyes, Ears, Brain, etc.

Today, everybody knows of Elon Musk and his different companies like Neuralink, and they have European counterparts too. After all, Musk's parents are strongly rumored to have been MI6 agents. I have no issue saying it as Musk was connected to me through a mutual military contact I will not name. The short version... Today's technology is "garbage" and so easily hackable that anybody with any tech skills could screw with you through any implants that have a Bluetooth or Wi-Fi connection of any kind. I am telling you from "personal experience" and I deal with it every day. For a long time, I was okay, then in 2018, somebody "re-authorized" the SDI/Star Wars Program through CIA. FYI... That is how I ended up being a newly minted 2LT working for DIA and CIA on projects managed out of DC, Black Programs. They had known about me and watched me since the SDI/Star Wars Program debacle in 1987 at Ft. Benning, GA, with the ARNG. It broke my heart to see it repeated with the Air Force a few years ago, as it was re-authorized in 2018. Why? Because few of us survived; and from the 1987 program, I am probably one of very few left alive to this day. They repeated it through Air Force this time, in preparation for launching Space Force. The results this time, in the short-term, were far worse than in 1987.

Technology aspect... I have implants from the original SDI program in the 1980's, all really good, utilizing 16-character 4-kernel UNIX verified, audited, and secured software management, implanted on the base of the skull, medulla oblongata clip, and vegas nerve wraps, and connected by 5G to Satellites for remote communications with soldiers. Over the decades, the Contractors, with and without approval, have added more implants to me, and "copied" them for new technology. The problem with today's technology is that it is "garbage" in the very literal sense. Today, best case scenario, they use Linuz, with only 2 kernels being locked down and the other 2 kernels being "open source" and they mimic the UNIX "Clock Date" very poorly; and being open source, totally lack security. The software is not reviewed, audited, or secure; so, these programmers put backdoors everywhere for many purposes. If they are not using Linux, and are using Microsoft OS or IOS, again, they have more issues than Linux. Therefore, software patches and updates "have" to be released almost weekly as they find issues.

I could go on for a long time; but I want to leave you with these thoughts... Please, please, please, under no circumstances allow technology to be implanted into your body that can be accessed by Bluetooth, Wi-Fi, cellular, etc. You will start hating life within days. It allows for just about anybody, hackers, etc., to connect to your implant's and turn you into a toy. Pretend to be your guides, your higher self, to tell you that you are now telepathic, when you are not, etc. etc. etc. I wish the living hell that I have been living in since early 2021 upon no Human being on Earth. I am being Dead Serious!!! It is Horrible!!! If you want just a little idea of how bad it could be, a little idea, watch the indie film on Amazon, Implanted.

Please heed my advice! You do not want to live with what I go through every day and night, when they implant fake memories to manipulate you. In my case, I have a lot of anger for The Patriot Act. Officers 'serve' for Life; and I have been passed around Contractors as a Guinea Pig for too long, too long...
